

Arjun Menon

Product Manager, Wallets & Digital Assets

+91 8089 460 980 | menonnujra@gmail.com | [linkedin.com/in/arjun-memon616/](https://www.linkedin.com/in/arjun-memon616/)

Product Manager with 6+ years of experience building consumer fintech, payments, and digital asset products. Led the development of onboarding journeys, multi-currency accounts, card programs, and transaction systems, balancing user experience, compliance, and risk controls to deliver scalable financial products used globally.

Highlights:

- Scaled a crypto wallet from 0 to 4K+ users in just 3 months.
- Drove \$4.5M+ in total value locked (TVL).
- Launched regulated wallet, payments, and stablecoin products across global markets.

Domain Expertise:

- Multi-currency accounts & IBAN systems
- Card issuance & payment networks
- Cross-border payments & rails
- PSP & bank integrations
- Fiat on/off ramp systems
- Wallet infrastructure & custody

PROFESSIONAL EXPERIENCE

Product Manager

05/2024 - Present

ScallopX

- Led product strategy and delivery of Scallop App, a hybrid neobank and Web3 wallet serving retail users through onboarding, payments, cards, multi-currency accounts, and digital asset journeys.
- Designed KYC-linked onboarding flows integrating identity verification, AML checks, and compliance layers, improving onboarding completion and first transaction activation by 40% through UX and transaction flow optimization.
- Worked closely with design and engineering teams to refine onboarding, funding, and transaction journeys using user feedback, behavioral insights, and iterative product improvements.
- Owned end-to-end Pay-In and Pay-Out experiences, including multi-rail transaction flows across fiat and on-chain systems.
- Scaled Pay-In infrastructure across 13+ rails (ACH, Wire, SEPA, NPSS, etc.), with defined SLAs, monitoring systems, and incident playbooks to ensure operational reliability.
- Reduced integration time to less than 14 days for new Pay-In and Pay-Out partners by standardizing onboarding flows, APIs, and integration playbooks.
- Led cross-functional execution across engineering, design, compliance, banking partners, and external vendors to deliver roadmap commitments and product launches.
- Led integration of Visa and Mastercard card issuance programs, working with BIN sponsors and processors using ISO 8583 and ISO 20022 standards.
- Partnered with engineering on APIs, transaction lifecycle design, mobile product delivery, and release execution across iOS and Android platforms.

Product Manager

12/2021 - 05/2024

NetObjex (acquired by Trevor Traina's [Kresus](#) group)

- Led the 0→1 build and launch of Kresus SuperApp, a consumer wallet integrating digital assets, payments, DeFi, NFTs, and mini-app experiences.
- Contributed to the growth of a digital asset ecosystem serving 1M+ users, supporting 1,000+ tokens across multiple blockchain networks.
- Scaled TVL from \$0 to \$4.5M through roadmap execution, ecosystem partnerships, liquidity integrations, and user-focused product improvements.

- Led UX improvements across onboarding, asset management, and mini-app/dApp interactions, contributing to 136K+ Web3 mini-app interactions and 245K+ cross-app user engagements.
- Conducted product discovery and iterative user research to identify friction points and optimize activation and growth funnels.
- Defined product requirements for MPC-based wallet architecture, seedless recovery, and account abstraction-enabled security features to improve accessibility and user trust.
- Worked closely with engineering and design teams to translate complex blockchain concepts into intuitive consumer experiences.
- Defined smart contract and API requirements for secure cross-chain asset management and transaction flows.

Blockchain Developer (Combined Experience)
BDI Plus, Freelance, BlockConnectorsLabs

06/2019 - 12/2021

- Built & delivered Hyperledger Fabric based digitized insurance at BDI Plus.
- Built and enhanced exchange features for CGCX.io, improving deposits, withdrawals, and trading flows as exchange primitives.
- Trained 100+ professionals on blockchain systems and smart contract design.
- Built foundational expertise in blockchain architecture, enterprise flows, and exchange operations.

CERTIFICATES

Technical Product Management, IIBA
 Project Management Foundations, PMI
 Certified Blockchain Architect, IIITMK

EDUCATION

Blockchain Architect (Ethereum & Hyperledger) • KBA, IIITMK • 2018 - 2019
 Bachelor of Technology (B.Tech) • University of Calicut • 2014 - 2018

COMMUNITY

- Recognized as a Top Product Management Voice on LinkedIn (1850+ followers).
- Active contributor in product and Web3 communities.

SKILLS

Product & Strategy: Product lifecycle, roadmaps, GTM, KPIs, cross-functional leadership.

Web3 & FinTech: Wallets, stablecoins, DeFi protocols, DEX/CEX, cross-chain systems, RWA, custody models, liquidity routing, KYC/AML.

Technical & Analytics: User journey design, onboarding funnels, conversion optimization, UX experimentation, Figma, JIRA, APIs, on-chain analytics, smart contracts, ERC standards.
